

**CTMA** *Commercial Technologies  
for Maintenance Activities*

**Working Symposium on Sustainment:  
Strengthening America's Military Readiness**

# WELCOME

**CTMA**

**NCMS**

An NCMS/DoD  
Partnership

# Thanks to the Organizing Committee

- Carl Adams (Joint Depot Maintenance Activities Group)
- Sean Krieger (Penn State Applied Research Laboratory)
- Bruce Long (Anteon Corporation)
- Rafael Reed (DoD Sustainment and Readiness Subpanel)
- Chuck Ryan (National Center for Manufacturing Sciences)
- Steve Siens (Joint Depot Maintenance Activities Group)
  
- Thanks to NCMS Staff:
  - Mark Gigax, Shirley Phillips, Anita Tolen
  
- Thanks to all the speakers, session chairs and workshop facilitators
  
- Thanks to all participants
  - Fill out your meeting attendance form and turn in at registration booth

# Symposium Flow

- Functions of the co-sponsoring organizations
  - Visit the booths in the registration area
- Needs of the DoD maintenance and repair community
- Current project efforts to address those needs
  - Tabletop Demonstrations at Reception
- Workshops to identify possible new projects resolving un-addressed needs
- Define action plan as follow-up to Symposium results

# Your Responsibility

- This is a *Working* Symposium
  - Point out significant needs you face in your job
  - Critically review current project efforts and pursue implementation of new developments for your facility
  - Expand your personal network of contacts
  - Actively participate in Workshops and in defining new projects
  - Become a project team member for future collaborations
